Cute. I quite like this. The levels go on longer than you think they would. I'd like them to be a bit faster so it could be more of a time-filler than a time-sink.. Flame Over: Your name is Blaze, you are a solitary fireman who is armed with a hose, axe, water bombs and foam. Your objective is to put out a raging fire that spread from an office to a factory (Levels) as soon as possible and make your way to the exit in time. In each level, you will be able to save people and escort them to safety. Each soul saved will be rewarded by 1 additional minute. Save cats, your favourite pets, and you will be getting additional health each time you do so and let me tell you, Blaze needs as much health as he can get! Do not forget to search rooms as you can find some valuable items, like the watch which give you a bit more time and others. With each level you beat, the difficulty increases. Remember that whatever time is left when you finish a level, it will carry to the next one and that will be the time your will have to clear the new level. You will earn money by putting out flames. Sometime one of a trapped person will refuse to follow you to safety because they have left something behind. Recover the items for them and be rewarded with a token. **REMEMBER, PEOPLE YOU SAVE EQUALS ADDITIONAL TIME!** Upgrade your perks if you accumulate enough money and tokens. In terms of game play, it is absolutely marvellous either with the gamepad or mouse and keyboard. The graphics are great and the soundtrack is SUPERB! This game is extraordinarily addictive but with a soundtrack like this, it becomes insanely addictive! \$11.99 well spend! Positives: -tGreat graphics -tControls are easy to master -tAddictive and fun to play -tChallenging -tAchievements -tTrading cards Negatives: -tCan be a tad too challenging at times Just get it! It is a brilliant game! 9/10 MORE THECPTFROGGY REVIEWS HERE FOLLOW THE CPT FROGGY CURATOR PAGE HERE. - The performance is good. Steady frame rate. No crash or game-breaking bug. - Fun twin-stick shooter. Good firefighting games are rare and this game does admirable job. - 360 controller works great. - There are 2 major flaws. First, the game doesn't do a very good job of explaining its mechanics. It doesn't tell you which item does what. It also doesn't tell you how to get the upgrade shop to appear in the beginning of the next run. You will need help from Google. Second, weird design choice. You have limited time, which can be added by rescuing people, and the clock doesn't reset when you start a new floor. When the time is up, the Grim Reaper will come after you. If he touches you, you die. And if you die by his scythe, you don't get the upgrade shop in the next run. So, if you think you can't make it to the next floor in time, you'd better walk into the fire and kill yourself. After all your heroic deeds of rescuing people and cats, you should commit suicide. Weird, huh? In conclusion: Despite its flaws, the game is solid. Recommend on sale.. Very frustrating. The first two levels are fun and challenging but at the 3rd level the difficulty goes off the charts to the point it is purely unfair. If you buy this game you are basically paying for 50% of the content because good luck getting through the second half.. Awesome, unique, fun, and way too hard. Prepare to be frustrated.. Dam being a fire fighter isn't easy.first you clear one room only to see the next room a living inferno.then you have to save other people and then a Cat.man this is madness. Really challenging but can't seem to put it down after starting.. Cute. I quite like this. The levels go on longer than you think they would. I'd like them to be a bit faster so it could be more of a time-filler than a time-sink.
